# TSI Link™ for Respiratory Protection

Unlock the Power of Your PortaCount Data

A cloud-based solution designed to enhance your respiratory protection program. Benefit from real-time compliance monitoring with centralized data, automated scheduling and reminders, and easy integration via the API.

Customer System

Program Management Portal
Compliance dashboards, automated scheduling, device management, and more to ensure efficiency and compliance.

API Integration
Seamless data transfer with HR portals, EHS software, Respirator Clearance and Training tools and more.

TSI Link™ Cloud

PortaCount™ Respirator Fit Testers

Centralize Your Data and Automate Your Workflow

TSI Link™ for Respiratory Protection combines centralized and standardized data with automated tracking and scheduling to save time and improve compliance.

Main features of the solution:

Centralized data stored in TSI Link™ Cloud
- Access to Program Management Portal to manage and track fit testing activity, through:
  - Robust and customizable people manager
  - Program status dashboards for Fit Tests,
  - Medical Clearance, and Respirator Training
  - Scheduling capabilities including Employee Self-Scheduler
  - Automatic email notifications for Due Soon, Overdue, Appointment Reminders, and more
- Seamless data integration with customer systems via API
- Continuous & Automatic Updates

Key benefits you will experience:

- **Time Savings, Streamlined Workflow:** Automate manual tasks like scheduling, emailing, and calibration tracking and improve overall program efficiency
- **Improved Data Security:** Eliminate the risk of data loss and human error from dual data entry
- **Enhanced Compliance:** Improve oversight and ensure all respirator users are fully compliant
- **Reduced Administrative Burden:** Simplify program management with centralized data and intuitive tools
- **Better Resource Management:** Ensure your PortaCount™ devices are always calibrated and ready for use
